GENERAL INFORMATION ON THE REPORTING ENTITY	
Reporting country *	Tunisia
Name and surname of the person submitting the report *	Hamda Aloui
Affiliation and contact details *	DGEQV@mineat.gov.tn

Performance Indicators

C. Performance indicators

Performance indicators are for measuring progress against the five operational objectives of The Strategy, in line with decision 3/COP.8. The year 2008 (the first year of the Strategy) serves as the baseline year.

Affected country Parties are requested to report on the following fourteen performance indicators out of the eighteen consolidated performance indicators presented in ICCD/CRIC(8)/5/Add.1 and Add.2.

Reporting is guided by means of templates, one for each performance indicator. Within the templates, shaded areas contain information and explanatory texts and white areas are for reporting purposes and need to be filled in by affected country Parties with relevant quantitative data, selection of multiple choice boxes, or narrative information.

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-1 for Outcome 1.1

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-1 for Outcome 1.1

Number and size of information events organized on the subject of DLDD and/or DLDD synergies with climate change and biodiversity, and audience reached by media addressing DLDD and DLDD synergies.

Understanding of the indicator

At the national and local level, the indicator measures the performance of Convention-related communication strategies, in particular, whether DLDD issues and synergies are being communicated and if so, whether the communication is considered to be effective. Effectiveness is assessed through the appraisal of the media campaigns carried out; the assumption is that the stronger the media campaigns on DLDD issues and synergies, the higher the probability of passing the messages on to the target audience. The focus of the indicator is on information activities specifically dedicated to DLDD and/or DLDD synergies with climate change and biodiversity. Other reporting entities will complement the information provided by affected country Parties by reporting on Convention-related communication strategies at subregional, regional and global level.

Data needed

Information on events/media specifically addressing DLDD and/or DLDD synergies with climate change and biodiversity.

Attendance lists of events (meetings, workshops, seminars), programmes/projects' documents, estimate of target audience for major media events (campaigns, radio and television programmes, etc.).

Events organized and media produced by the UNCCD NFP or organized/produced by third parties not directly reporting to the Convention (TV channels, newspaper editors, etc.) shall be considered.

Data sources (indicative only)

International and national media (newspapers) advertising the events at national and local level, the Internet, the organizers of the events, programmes/projects' final reports.

Check the glossary for

'NFP', 'ICT', 'Information events', 'Media products', 'STIs', 'CSOs'

Media products have been grouped into: (a) Paper media products (articles, press releases, leaflets, flyers, brochures and comics, etc.); (b) radio and television programmes; (c) other ICT (websites, CDs, DVD, etc.).

Overall target

By 2018, 30 per cent of the global population is informed about DLDD and DLDD synergies with climate change and biodiversity

Number of information events

Year	Number of information events	Estimated number of participants in the information events
2008	10	15340
2009	16	994

National contribution to the target

On the basis of the information you have provided above, estimate the proportion (%) of the population in your country which is informed about DLDD and DLDD synergies with climate change and biodiversity at the time of reporting?

Estimated share of total country population =

40 %

Qualitative assessment

Is the information you have provided on communication processes part of a national communication strategy addressing environmental issues?

Yes

Performance indicator CONS-O-3 for Outcome 1.3

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-3 for Outcome 1.3

Number of CSOs and science and technology institutions participating in the Convention processes.

Understanding of the indicator

At the national level, the indicator measures the level of participation of civil society organizations (CSOs) and science and technology institutions (STIs) in DLDD-related programmes and projects. The indicator will outline whether the active involvement of these stakeholders in country-based initiatives increases over time and whether programmes/projects are valid tools for the engagement of, and receiving contributions from, CSOs and STIs at the field level. Other reporting entities will complement the information provided by affected country Parties by reporting on the involvement of CSOs and STIs at subregional, regional and global level; in particular, the secretariat and the GM will report on the involvement of CSOs and STIs at the institutional level.

Data needed

The specification of the organizations involved in the programmes/projects as reported in the PPSs.

Data sources (indicative only)

PPSs submitted to the UNCCD as part of the reporting exercise.

Check the glossary for

'STIs', 'CSOs', 'PPS', 'Convention processes'

Overall target

A steady growth in the participation of CSOs and science and technology institutions in the Convention processes is recorded along the implementation period of The Strategy.

In the PPSs you have specified the number of CSOs and the number of STIs involved in each programme/project. Add these numbers and give the totals by year in the table below.

Year	Number of CSOs involved in DLDD-related programmes/projects	Number of STIs involved in DLDD-related programmes/projects
2008	30	20
2009	30	20
2010		
2011		
2012		
2013		
2014		
2015		
2016		
2017		
2018		

Sources of information

Programme and project sheets (PPSs) submitted to UNCCD

National contribution to the target

At the time of reporting, is your government undertaking concrete initiatives to increase the participation of CSOs and STIs in DLDD-related programmes and projects?

Yes

Qualitative assessment

Specify the reasons for the increasing and/or decreasing trend of the participation of CSOs and STIs to DLDD-related programmes/projects. (tick as many boxes as necessary and rate the level of importance)

	Not important	Important	Very important
X Increased networking and collaboration opportunities			X
X Increased access to information and to national and/or international financing opportunities			X
X Increased willingness of the government in working with CSOs		X	
X Increased interest of donors in working with CSOs		X	
X Strengthened organizational, project management and fund-raising capacity of CSOs		X	
X Increased funding opportunities requiring partnership with the STIs		X	
X Strengthened organizational, project management and fund-raising capacity of the STIs		X	
Other			

Other (specify) (max 30 words)

No answer provided

Reasons for decreasing for CSOs

	Not important	Important	Very important
Costly participatory processes			
Low organizational, fund-raising and project management capacity of CSOs			
Government policies and/or the legal environment do not foster the engagement of CSOs			
Diminishing funding			
Other			

Other (specify) (max 30 words)

No answer provided

Reasons for decreasing for STIs

	Not important	Important	Very important

DLDD topics are not prioritized by national STIs			
Low organizational, fund-raising and project management capacity of STIs			
Decreased networking opportunities at national and international level			
Diminishing funding			
Other			

Other (specify) (max 30 words)

No answer provided

Performance indicator CONS-O-4 for Outcome 1.3

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-4 for Outcome 1.3

Number and type of DLDD-related initiatives of CSOs and science and technology institutions in the field of education.

Understanding of the indicator

The indicator measures the number and type of DLDD-related initiatives undertaken by CSOs and STIs in the education sector at the national level. The assumption is that the higher the number of DLDD-related education initiatives undertaken by these stakeholders, the stronger their interest in addressing DLDD problems. A distinction is made between activities carried out in the formal education sector and in the non-formal education sector. This indicator focuses on "education" because "awareness" and "advocacy" are already measured through indicators CONS-O-1 and CONS-O-2, respectively. Other reporting entities will complement the information provided by affected country Parties by reporting on the involvement of CSOs and STIs at subregional, regional and global level.

Data needed

Information on initiatives undertaken in the field of education that may be found in: written communications by CSOs and STIs to the NFP; contractual and/or programme/project-related documents; records of academic bodies and their curricula.

Only initiatives in the field of education (formal and non-formal) directly relating to DLDD issues are to be considered.

Data sources (indicative only)

CSOs and STIs operating in the country.

Check the glossary for

'CSOs', 'STIs', 'NFP', 'Formal education', 'Non-formal education'.

Overall target

A steady growth in the number of DLDD-related education initiatives undertaken by CSOs and science and technology institutions is recorded along the implementation period of The Strategy

Number of DLDD-related initiatives undertaken

Year	Number of DLDD-related initiatives undertaken by CSOs formal education	Number of DLDD-related initiatives undertaken by CSOs non-formal education	Number of DLDD-related initiatives undertaken by STIs formal education	Number of DLDD-related initiatives undertaken by STIs non-formal education

Operational Objective 2: Policy framework

Performance indicator CONS-O-5 for Outcomes 2.1, 2.2 and 2.3

Operational Objective 2: Policy framework

Performance indicator CONS-O-5 for Outcomes 2.1, 2.2 and 2.3

Number of affected country Parties, subregional and regional entities to have finalized the formulation/revision of NAPs/SRAPs/RAPs aligned to The Strategy, taking into account biophysical and socio-economic information, national planning and policies, and integration into investment frameworks.

Understanding of the indicator

At the national level, the indicator measures the performance of affected country Parties in formulating or revising their NAPs in alignment with The Strategy. While providing information on this process, the indicator also outlines whether: (a) the analysis of DLDD drivers, barriers to possible solutions, and measures that may eventually overcome these barriers, has been carried out; (b) the alignment process has been supported by biophysical and socio-economic baseline information; (c) the action programmes have been included in integrated investment frameworks; and (d) the action programmes have been integrated with other existing national plans and policies. The indicator will inform on the extent to which Parties have responded to decision 3/COP.8, paragraph 45, and on the feasibility of assessing the progress of The Strategy over its implementation period (2008–2018). Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on formulation or revision of SRAPs and RAPs in alignment with The Strategy.

Data needed

UNCCD NAP. Only a NAP formally approved by the relevant governmental authorities is to be considered as 'finalized'. Other relevant planning documents.

Data sources (indicative only)

UNCCD NFP.

Check the glossary for

'Finalized', 'NAP', 'NFP', 'driver', 'barrier', 'integrated investment framework', 'baseline'

Overall target

By 2014, at least 80 per cent of affected country Parties, subregional and regional entities have formulated/revise a NAP/SRAP/RAP aligned to The Strategy.

NAP Adoption and Revision

Had your country already adopted a NAP prior to The Strategy?

Yes

If yes, has your country revised the NAP in alignment with The Strategy?

No

If you have revised the NAP in alignment with The Strategy, specify the date of its approval.

No answer provided

If you have not revised the NAP in alignment with The Strategy, specify why the process was not initiated. (tick as many boxes as necessary and rate the level of importance)

	Not important	Important	Very Important
Not a priority for the government			
Lack of capacities			
Lack of financial resources			

Understaffing			
Lack of time			
Poor internal coordination among relevant ministries			
Other			

Other (specify) (max 30 words)

No answer provided

If your country had no NAP adopted prior to The Strategy, have you formulated an aligned NAP after The Strategy's adoption in 2008?

No answer provided

If yes, specify the date of its approval.

No answer provided

If at the time of reporting you have not formulated a NAP aligned to The Strategy specify why the process was not initiated. (tick as many boxes as necessary and rate the level of importance)

	Not important	Important	Very Important
Not a priority for the government			
Lack of capacities			
Lack of financial resources			
Understaffing			
Lack of time			
Poor internal coordination among relevant ministries			
Other			

Other (specify) (max 30 words)

No answer provided

Question marked as 'No answer'.

The questions below apply only to those countries having a NAP aligned to The Strategy

If you have a NAP, is it supported by biophysical and socio-economic baseline information?

No answer provided

If you have a NAP, does it assess DLDD drivers?

No answer provided

If you have a NAP, does it assess the barriers to sustainable land management?

No answer provided

If yes, does the NAP include recommendations to remove these barriers?

No answer provided

If you have a NAP, has it been included into an integrated investment framework?

No answer provided

If you have a NAP, has it been integrated into national development planning and relevant sectoral and investment plans and policies?

No answer provided

If yes, has the NAP been integrated into your country's Poverty Reduction Strategy Paper?

No answer provided

Did you refer to the Guidelines on the alignment of action programmes with The Strategy as proposed in ICCD/COP(9)/2/Add.1 while developing or reviewing your action plan?

No answer provided

Question marked as 'No answer'.

Sources of information

Specify the sources used to extract the information provided above (add as many rows as necessary). If reporting online, you may also upload relevant documents.

No answer provided

Attachments:

none

National contribution to the target

If you do not have an approved NAP aligned to The Strategy at the time of reporting, when do you plan to have it developed and approved?

2010-11

Question marked as 'No answer'.

Qualitative assessment

Has the formulation and/or alignment of the NAP been supported by external assistance?

No answer provided

If yes, did you receive assistance from one or more of the following institutions? (more than one box can be ticked)

No answer provided

If yes, which type of assistance did you receive?

No answer provided

Identify the major difficulties experienced in the formulation/alignment process (tick as many boxes as necessary and rate the level of importance).

	Not important	Important	Very Important
Not a priority for the government			
Poor availability of biophysical and socio- economic baseline information			
Existing investment frameworks are not fully compatible with the NAP			
Streamlining the NAP into existing plans and policies is too time-consuming			
Other			

Other (specify) (max 30 words)

No answer provided

Performance indicator CONS-O-7 for Outcome 2.5

Performance indicator CONS-O-7 for Outcome 2.5

Number of initiatives for synergistic planning/programming of the three Rio Conventions or mechanisms for joint implementation, at all levels.

Understanding of the indicator

The indicator measures the existence of synergistic processes through the number of instruments (i.e. joint planning/programming and/or operational mechanisms) in place at the national level which foster the introduction of or strengthen the mutually reinforcing measures among the three Rio Conventions. The assumption is that the higher the number of enabling instruments in place, the higher the possibility of achieving synergies in implementation. This information will be complemented by the reporting of other reporting entities on synergistic processes at the subregional, regional and global level.

Data needed

Planning/programming documents and legislative/regulatory documents.

Only operational mechanisms which have the achievement of joint implementation, synergies, convergence, and the introduction or strengthening of reinforcing measures among the Rio Conventions clearly stated in their objectives shall be considered under this indicator.

Data sources (indicative only)

Relevant national ministries.

Check the glossary for

“Joint planning/programming initiatives”, “Operational mechanisms for joint implementation or mutual reinforcement”

For an indicative list of activities by Parties to promote synergies among the Rio Conventions, refer to [target=' blank>UNEP/CBD /COP/DC/IX/16, Annex II](#)

Overall target

By 2014, each affected country Party has either one joint national plan in place or functional mechanism(s) to ensure synergies among the three Rio Conventions

Are you implementing joint planning/programming initiatives for the three Rio Conventions?

Yes

If yes, specify the type of joint initiative(s) (tick as many boxes as necessary)

- **Review of national plans and identification of gaps in synergies**
- **Identification of sectors and policies that could benefit from synergies and cooperation**
- **Review of plans and policies to enhance cooperation**
- **Enhancement of the institutional and scientific capacity of relevant stakeholders as well as of their awareness**

Other (specify) (max 30 words)

No answer provided

Do operational mechanisms for joint implementation or mutual reinforcement exist in your country?

Yes

If yes, specify the type of mechanism(s) (tick as many boxes as necessary)

- **Establishment of a national coordinating committee for implementation of the three Rio Conventions**

Other (specify) (max 30 words)

Etude et plan d'action de synergie entre les conventions de Rio (CBD, CCC, CCD)

Projet de synergie entre les trois conventions de Rio avec l'appui de la GTZ

Sources of information

Specify the sources used to extract the information provided above (add as many rows as necessary). If reporting online,

you may also upload relevant documents.

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-8 for Outcomes 3.1 and 3.2

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-8 for Outcomes 3.1 and 3.2

Number of affected country Parties, subregional and regional entities to have established and supported a national/subregional /regional monitoring system for DLDD.

Understanding of the indicator

At the national level, the indicator measures the monitoring potential of the country by quantifying the number of monitoring systems established and supported. These monitoring systems may be specifically or partially (in the case of environmental monitoring systems) dedicated to UNCCD reporting. The indicator will inform on the extent to which it is realistic to expect more regular and coherent reporting by affected country Parties during the implementation of The Strategy and beyond. This information will be complemented by the reporting of other reporting entities on UNCCD-relevant monitoring systems established and supported at the subregional, regional and global level.

Data needed

Information on monitoring systems established within the national Ministries or other bodies/institutions.

Programmes/projects' documents, fiches and summary sheets, programmes/projects' interim or final reports.

Only those monitoring systems storing all or most of the information needed for reporting to the UNCCD shall be considered.

Data sources (indicative only)

Relevant national ministries, programme/project management units, other non-governmental initiatives.

Check the glossary for

'monitoring system', 'vulnerability'

Overall target

By 2018, at least 60 per cent of affected country Parties, subregional and regional reporting entities have established and supported national monitoring systems for DLDD

Is a monitoring system for DLDD established at the national level?

Yes

If yes, specify whether this system is: Functional

Yes

If yes, specify whether this system is: Regularly Updated

No

If no DLDD-specific monitoring system is in place, is an environmental monitoring system partially covering DLDD established at the national level?

No answer provided

List any monitoring system available at the sub- national level that can contribute to the UNCCD reporting (add as many rows as necessary).

- programme ROSELT (www.oss.online.org)
 - système d'alerte précoce à la secheresse dans les pays du Magreb (www.oss.online.org)

Performance indicator CONS-O-9 for Outcome 3.1 and 3.2

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-9 for Outcome 3.1 and 3.2

Number of affected country Parties, subregional and regional entities reporting to the Convention along revised reporting guidelines on the basis of agreed indicators

Understanding of the indicator

The indicator measures the use of biophysical and socio-economic information at the national level in defining a commonly agreed core set of impact indicators for the UNCCD and in monitoring progress against these indicators using harmonized methodologies.

The indicator will inform to what extent it is possible to compile a comparable and global assessment of UNCCD impact.

Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on the use of impact indicators at the subregional and regional levels, if and when impact indicators for these levels will be commonly agreed upon by the Conference of the Parties.

Data needed

Reports to the UNCCD by affected country Parties in 2012 and 2016.

The information to report on this indicator will be compiled by affected country Parties every four years when reporting on the strategic objectives that require biophysical and socio-economic information (i.e. SO1, SO2 and SO3). Reporting on this indicator is due in 2012 and in 2016 only.

Data sources (indicative only)

UNCCD NFP.

Check the glossary for

'NFP'

Overall target

By 2018, at least 90 per cent of affected country Parties, subregional and regional reporting entities report to the Convention in compliance with the new reporting guidelines.

Has your country reported on the two impact indicators considered by decision 13/COP.9 to be the minimum reporting requirement?

No answer required for this indicator in the 2010 reporting cycle

Number of impact indicators for strategic objectives 1, 2 and 3 your country has reported on in 2012 and 2016

2012

No answer required for this indicator in the 2010 reporting cycle

2016

No answer required for this indicator in the 2010 reporting cycle

While reporting on impact indicators, did you refer to the reporting guidelines, i.e. using the common baselines and methodologies defined by the CST?

No answer required for this indicator in the 2010 reporting cycle

Sources of information

Specify the sources used to extract the information provided above (add as many rows information as necessary). If reporting online, you may also upload relevant documents.

No answer required for this indicator in the 2010 reporting cycle

National contribution to the target

If in 2012 your country has not reported on some or all of the impact indicators for the UNCCD, when do you plan to do so?

No answer required for this indicator in the 2010 reporting cycle

If in 2012 your country has not complied with the reporting guidelines, i.e. using the common baselines and methodologies defined by the CST, when do you plan to do so?

No answer required for this indicator in the 2010 reporting cycle

Qualitative assessment

Identify the major difficulties experienced in reporting against the impact indicators:

No answer required for this indicator in the 2010 reporting cycle

No answer required for this indicator in the 2010 reporting cycle

Performance indicator CONS-O-10 for Outcome 3.3 and 3.4

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-10 for Outcome 3.3 and 3.4

Number of revised NAPs/SRAPs/RAPs reflecting knowledge of DLDD drivers and their interactions, and of the interaction of DLDD with climate change and biodiversity.

Understanding of the indicator

The indicator measures knowledge-transfer processes from the theoretical to the operational level. This is done through an assessment carried out by affected country Parties (self-assessment) of the levels of traditional and scientific knowledge reflected in their NAPs. The assumption is that NAPs based on sound scientific and traditional knowledge will propose more significant and effective strategies and activities for implementation at the national level, and will, ultimately, perform better than those NAPs that do not take into account available knowledge on DLDD and DLDD synergies. The indicator will inform to what extent UNCCD implementation is likely to achieve meaningful results. Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on the assessment of their SRAPs and RAPs.

Data needed

NAP aligned to The Strategy.

Scientific literature consulted for the development of the NAP.

Data sources (indicative only)

UNCCD NFP.

Check the glossary for

'NAP', 'NFP', 'driver'

Countries not having a NAP or not having aligned their NAP to The Strategy do not report on this indicator.

The below questions are meant to guide the country's self-assessment of its aligned NAP.

Overall target

By 2018, at least 70 per cent of revised NAPs/SRAPs/RAPs have successfully gone through a quality self-assessment.

Countries not having a NAP or not having aligned their NAP to The Strategy do not report on this indicator.

The below questions are meant to guide the country's self-assessment of its aligned NAP.

In your NAP, is the identification of biophysical and socio-economic drivers, and of their interaction, knowledge-based?

Yes

If yes, specify upon which type of knowledge it is based (tick as many boxes as necessary and rate the level of importance).

- Scientific literature
- Expert knowledge
- Traditional knowledge

If based on scientific literature, list the main reference literature consulted (add as many rows as needed). If reporting online, you may also upload relevant documents.

- carte d'érosion hydrique et éolienne projet FAO 1987
- carte phytoécologique Schoenoberger Pontanier et Folret'INRAT 1970
- carte bioclimatique 'leHerou 1976
- (Ministère de l'agriculture-Projet PNUD/FAO/TUN/ 92/001-Appui technique pour la mise en oeuvre de la stratégie nationale de CES. L'approche participative dans le domaine de la CES en Tunisie- Eléments de méthodologie- Avril 1997)".
- "(Ministère de l'agriculture-Projet PNUD/FAO / TUN/92/001- Appui technique pour la mise en oeuvre de la stratégie nationale de CES. Elaboration d'un système de suivi-évaluation de la CES- Le système de suivi proposé- Un guide pratique- M.S.BACHTA- Mai1997).
- (OSS-Conseil Scientifique et Technique- Mise en oeuvre de la stratégie 2000 de l'OSS Rapport d'activité scientifique et technique de 1997 et programme 1998-Paris-Janvier 1998).
- Projet FAO/UTF/TUN/021/TUN -Gestion des ressources naturelles - Rapport du bilan diagnostique - sept. 1995).

In your NAP, is the analysis of the interaction between drought mitigation and restoration of degraded land and climate change mitigation/ adaptation or biodiversity conservation knowledge-based?

No answer provided

If yes, specify upon which type of knowledge it is based (tick as many boxes as necessary and rate the level of importance).

No answer provided

If based on scientific literature, list the main reference literature consulted (add as many rows as needed). If reporting online, you may also upload relevant documents.

No answer provided

Is drought mitigation analyzed and/or reflected in some of the actions outlined in the NAP?

No answer provided

Performance indicator CONS-O-11 for Outcome 3.5

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-11 for Outcome 3.5

Type, number and users of DLDD-relevant knowledge-sharing systems at the global, regional, subregional and national levels described on the Convention website.

Understanding of the indicator

The indicator measures the presence at the national level of DLDD-related knowledge-sharing processes, through the quantification of the type and number of existing knowledge-sharing systems. Effectiveness of these systems is measured through quantification of their user-base. The indicator will inform to what extent scientific and traditional knowledge, including best practices, are available to and sufficiently shared with end-users. This information will be complemented by the reporting of other reporting entities on existing UNCCD-relevant knowledge-sharing systems at the subregional, regional and global level.

Data needed

Information from websites.

Only DLDD-relevant knowledge-sharing systems and networks shall be considered.

Data sources (indicative only)

Relevant organizations at the national level, relevant national ministries hosting knowledge-sharing systems and networks within their websites.

Check the glossary for

Operational Objective 4: Capacity building

Performance indicator CONS-O-13 for Outcomes 4.1 and 4.2

Operational Objective 4: Capacity building

Performance indicator CONS-O-13 for Outcomes 4.1 and 4.2

Number of countries, subregional and regional reporting entities engaged in building capacity to combat DLDD on the basis of NCSA or other methodologies and instruments

Understanding of the indicator

At the national level the indicator measures the presence of capacity-building processes through the quantification of existing major capacity-building initiatives. The indicator will inform to what extent affected country Parties may be expected to meet their obligations foreseen by the Convention, including forthcoming ones (i.e. new reporting requirements, establishment of environmental monitoring systems, accessing new financing mechanisms). This information will be complemented by the reporting of other reporting entities on existing UNCCD-related capacity-building initiatives at the subregional, regional and global level.

Data needed

Information on DLDD-related capacity building initiatives.

Only major capacity-building plans/programmes/projects mentioned in the PPSs are to be considered.

Data sources (indicative only)

PPSs submitted to UNCCD as part of the reporting exercise

Programmes/projects' documents, fiches and summary sheets, interim or final reports of those programmes and projects identified through the PPSs as having DLDD-related capacity-building as a major objective.

Check the glossary for

'NCSA', 'PPS'

Overall target

By 2014, at least 90 per cent of affected country Parties, sub-regional and regional reporting entities implement DLDD specific capacity building plans or programs or projects.

Number of DLDD-related capacity building initiatives undertaken

Identify, if any, relevant programmes and projects through the PPSs and check corresponding programmes/projects' documents, fiches and summary sheets, and interim or final reports, to extract the information needed for completing the table below

Year	NCSA-generated	Other initiatives

Question marked as 'No answer'.

National contribution to the target

If at the time of reporting there are no DLDD-specific capacity building plans, programmes or projects implemented in your country, when do you plan to have something in place?

No answer provided

Qualitative assessment

Have you received assistance from one or more of the following institutions to build capacities to combat DLDD? (more than one box can be ticked)

- Multilateral (UN agencies, IGOs, international financing institutions, etc.)

If yes, which type of assistance have you received?

- Technical support

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-14 for Outcome 5.1

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-14 for Outcome 5.1

Number of affected country Parties, subregional and regional entities whose investment frameworks, established within the IFS devised by the GM or within other integrated financing strategies, reflect leveraging national, bilateral and multilateral resources for combating desertification and land degradation.

Understanding of the indicator

At the national level, the indicator measures the presence of integrated financing processes allowing the leverage of national, bilateral and multilateral resources for combating desertification and land degradation, through the quantification of investment frameworks developed by country Parties within the IFS devised by the GM or other integrated financing strategies promoted by diverse international institutions. This information will be complemented by the reporting of other reporting entities on the establishment of integrated investment frameworks at national, subregional and regional level.

Data needed

Investment frameworks documents.

Only investment frameworks prepared along the guidelines devised within integrated financing strategies shall be considered.

Data sources (indicative only)

Relevant national ministries.

Check the glossary for

'IFS', 'NAP' 'leveraging', 'integrated investment framework'

Overall target

By 2014, at least 50 per cent of affected country Parties, subregional and regional entities have developed integrated investment frameworks.

Has your country developed an integrated investment framework?

Yes

If yes, specify when it was developed.

07/10/2010

The questions below apply only to those countries which have an integrated investment framework.

Is your integrated investment framework based on the NAP?

Yes

If based on the NAP, who assisted in its development?

- **GM**

Other (specify) (max 30 words)

No answer provided

If assisted, which type of assistance did you receive?

- **Capacity building**

If assisted by the GM, was it devised within the IFS?

Yes

If your country has an integrated investment framework based on the NAP, is this framework concretely allowing the leverage of national, bilateral and multilateral resources for combating DLDD?

Yes

Sources of information

Specify the sources used to extract the information provided above (add as many rows as necessary). If reporting online, you may also upload relevant documents.

Performance indicator CONS-O-16 for Outcome 5.2

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-16 for Outcome 5.2

Degree of adequacy, timeliness and predictability of financial resources made available by developed country Parties to combat DLDD.

Understanding of the indicator

This is a qualitative indicator requiring the perception-based assessment by developing affected country Parties of the adequacy, timeliness and predictability of bilateral contributions received from developed country Parties for the implementation of the Convention. "Adequate", "timely" and "predictable" resources are frequently referred to in The Strategy as being necessary to ensure proper planning and effective implementation. Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on their perception-based assessments.

Data needed

-

Data sources (indicative only)

-

Check the glossary for

-

Only affected country Parties entitled to receive assistance under the UNCCD are requested to report on this indicator.

Overall target

No target has been set for this indicator

How would you rate the bilateral assistance received within the framework of UNCCD for the implementation of The Strategy and of the Convention?

Adequacy of bilateral assistance

Not adequate

Timeliness of bilateral assistance

Not timely

Predictability of bilateral assistance

Not predictable

Provide narrative justification on your above rating (max 100 words)

Inadéquation de l'aide bilatérale pour la mise en oeuvre de la convention CNULCD

Qualitative assessment

Did you receive assistance in raising resources from bilateral donors?

Yes

If yes, from whom? (more than one box can be ticked)

- **GM**
- **GEF**
- **Multilateral (UN agencies, IGOs, international financing institutions, etc.)**

Other (specify) (max 30 words)

No answer provided

Has the level of adequacy, timeliness and predictability of bilateral assistance constrained your country's performance in planning and implementation with respect to UNCCD?

Yes

Performance indicator CONS-O-17 for Outcome 5.3

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-17 for Outcome 5.3

Number of DLDD-related project proposals successfully submitted for financing to international financial institutions, facilities and funds, including the GEF.

Understanding of the indicator

The indicator measures the capacity of fund-raising at the national level, through the quantification of project proposals successfully submitted for funding to the various financing organizations. The indicator will inform to what extent affected country Parties make increasing efforts to mobilize resources. This information will be complemented by the reporting of other reporting entities on the fund-raising efforts at national, subregional and regional level.

Data needed

Information contained in the PPSs and SFAs submitted to UNCCD.

Data sources (indicative only)

PPSs and SFAs submitted to UNCCD as part of the reporting exercise.

The PPS requires specification of the project 'status' thus it allows the identification of relevant projects to be considered by this indicator and the monitoring of their approval status.

The SFA requires the specification of amounts committed to approved projects.

Check the glossary for

'PPS', 'SFA', 'Project proposals', 'currency', 'Successfully submitted proposals'

Overall target

A steady growth in the number of DLDD-related successfully submitted project proposals is recorded along the implementation period of The Strategy.

Question marked as 'No answer'.

Number of project proposals submitted (pipeline) and ongoing, by biennium

Biennium	submitted (pipeline)	ongoing
2008-2009		
2010-2011		
2012-2013		
2014-2015		
2016-2017		

Question marked as 'No answer'.

Amount of funds raised, by biennium

You can find the amount of funds raised for the ongoing projects in the corresponding SFAs. Sum these amounts and give the total in the below table.

Biennium	Total amount
2008-2009	---
2010-2011	
2012-2013	
2014-2015	
2016-2017	

Question marked as 'No answer'.

Sources of information

Specify the sources used to extract the information provided above: Programme and Project Sheets and Standard Financial Annexes

No answer required

National contribution to the target

According to the information provided above, do you think that you are mobilizing enough resources from international financial institutions, facilities and funds through successfully submitted project proposals?

Yes

If no, do you plan to increase the country's efforts in presenting project proposals to international financial institutions, facilities and funds?

No answer provided

Qualitative assessment

Identify the reasons for the increasing or decreasing trend of project proposals successfully submitted to international financial institutions, facilities and funds (tick as many boxes as necessary and rate the level of importance).

Reasons for increasing

		Not important	Important	Very Important
X	Easier and more transparent application procedures		X	
X	Increased capacities of national stakeholders to prepare applications			X
X	Major natural hazards occurred at the national level considerably increased the level of resources made available by the international community		X	
X	Access to funding is increasingly facilitated by third parties such as the private sector		X	
X	Existence of a financing strategy (IFS or others)	X		
	Other			

Other (specify) (max 30 words)

No answer provided

Reasons for decreasing

		Not important	Important	Very Important
X	Financing opportunities are not publicised enough, lack of access to necessary information		X	
X	Complicated application procedures, the level of complexity being worsened by the different requirements of the various donors			X
X	Limited financial resources are made available for DLDD-related programmes/projects, and lack of DLDD-specific allocations within donors' portfolio.			X
	Other			

Other (specify) (max 30 words)

No answer provided

Performance indicator CONS-O-18 for Outcome 5.5

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-18 for Outcome 5.5

Amount of financial resources and type of incentives which have enabled access to technology by affected country Parties.

Understanding of the indicator

The indicator measures whether access to technology is facilitated by means of financial resources or economic and policy incentives. The indicator will inform to what extent an enabling environment for technology transfer has been created at the national level and whether sufficient resources are dedicated to technology transfer. Subregional and regional reporting entities will complement the information provided by affected country Parties by reporting on financial resources and type of incentives which have enabled access to technology at the subregional and regional level.

Data needed

Budgets of relevant programmes and projects

Information on policy/regulatory, financial and fiscal incentives. Incentives facilitating access to technology shall be those established and implemented at the national level, not necessarily within the framework of DLDD-related cooperation.

Data sources (indicative only)

Financial documents of programmes and projects submitted as PPSs to the UNCCD as part of the reporting exercise.

National policy, regulatory and economic/financial documents.

Check the glossary for

'technical support', 'incentive', 'PPS'

Check the programmes and projects financial documents (budgets) and extract amounts allocated to: (1) technical support – material aid (equipment, hardware and software, machineries, etc); and (2) technical support – knowledge aid (technical assistance and advisory services). Add these amounts to provide totals in the table below.

Refer to the programmes and projects submitted as PPSs to the UNCCD and their relating budgets

Overall targets

A steady growth in the financial resources allocated to facilitate access to technology by affected country Parties is recorded along the implementation period of The Strategy.

A steady growth in the number of economic and policy incentives reported upon is recorded along the implementation period of The Strategy.

Question marked as 'No answer'.

Estimate of amounts allocated to facilitate technology transfer

Check the programmes and projects financial documents (budgets) and extract amounts allocated to: (1) technical support – material aid (equipment, hardware and software, machineries, etc); and (2) technical support – knowledge aid (technical assistance and advisory services). Add these amounts to provide totals in the table below.

Refer to the programmes and projects submitted as PPSs to the UNCCD and their relating budgets

Year	Technical support – material aid	Technical support – knowledge aid
2008	---	---
2009		
2010		
2011		
2012		
2013		
2014		
2015		
2016		
2017

Standard Financial Annex

D. Standard Financial Annex

The CRIC has recommended that financial reporting be based on a standard financial reporting format to be used by affected country Parties and their development partners. It also indicated that emphasis in reports should be put on financial matters and also on an analysis of the impact of the activities undertaken (ICCD/CRIC(8)/5).

The purpose of the Standard Financial Annex (SFA) is to consolidate information on resources mobilized by affected country Parties and their development partners under the framework of relevant strategies and action programmes. It facilitates the aggregation of data on financial commitments, financial flows and resources available by all relevant funding sources for activities related to the implementation of the Convention. It also helps minimize double counting in financial statistics (ICCD/CRIC(8)/5/Add.4).

The SFA is to be used by each country Party and other reporting entities to list all financial commitments they have made during the reporting period in support of institutions, programmes, projects, as well as other relevant initiatives undertaken at national or international level for the implementation of the Convention.

More specifically, for each relevant financial commitment or allocation made in the reporting period, the SFA requires a minimum set of data grouped as follows:

Identification, i.e. data required to identify the reporting entity, the funding source and the activity financed;

Basic data, i.e. data specifying the amount and type of financial commitment made, as well as the recipient country, region, and/or organization, and the funding period, if applicable;

(c) Classification, i.e. categorization of the funded activity according to the Rio Markers for desertification, and the UNCCD Relevant Activity Codes (RACs).

The compilation of the SFA is guided by means of a template, which responds to the recommendations of CRIC 7, and builds on the GM methodological guide for financial reporting presented to CRIC 6 as part of the report of the intergovernmental Ad Hoc Working Group to improve the procedures for communication of information.

Within the template, shaded areas contain information and explanatory texts, while white areas are for reporting purposes and need to be filled in by the reporting entities with relevant data or narrative information.

Decision 13/COP.9, paragraph 8, invites country Parties and other reporting entities to refer to common terminology and definitions. Therefore, these guidelines should be read in conjunction with the comprehensive glossary presented in a separate document.

Financial Commitment #1 — Programme de développement agropastoral et de promotion des initiatives locales

Reporting Entity

Enter the name of the country or organization submitting the official report to the UNCCD to which the financial commitment will be attached in the form of a consolidated Standard Financial Annex

Programme and Project Sheets

E. Programme and Project Sheet

Programme and Project Sheets (PPS) are used to provide more detailed information on programmes or projects undertaken or completed in the reporting period. This includes programmes and projects in the pipeline, as well as final proposals submitted for funding to internal or external funding sources. All country Parties and other reporting entities involved in the financing, coordination or implementation of relevant programmes and projects are requested to prepare a PPS for each of them, and to attach them to their official report to the UNCCD.

The compilation of the PPS is guided by means of a template. These templates are intended to collect a minimum set of qualitative and quantitative data to facilitate the analysis of funding and investment flows, and the production of better financial statistics related to UNCCD implementation (ICCD/CRIC(8)/5/Add.4), with a view to enabling the CRIC to undertake an objective review of progress in the implementation of the Convention and The Strategy. The PPS also facilitate the computation of certain performance and impact indicators.

A distinctive feature of the PPS is that it allows country Parties and other reporting entities to specify which strategic and operational objectives of The Strategy are targeted by each programme or project. In addition, it allows for individual programme or project components to be categorized using the Rio Markers for desertification and Relevant Activity Codes (RACs).

Furthermore, the PPS can be used to indicate whether the objectives of other Rio Conventions (i.e. the UN Convention on Biological Diversity, CBD – and the UN Framework Convention on Climate Change, UNFCCC) are also addressed by the programme or project. This is done through the use of the biodiversity and climate change Rio Markers, respectively.

The PPS offers an opportunity to increase the visibility of relevant programmes and projects, thereby creating the conditions for a better sharing of experiences and lessons, as well as the transfer of knowledge in general. It also favours collaboration and networking by facilitating the identification of potential synergies.

Lastly, the PPS also allows country Parties and other reporting entities to provide a narrative description of the expected or achieved results. This information will facilitate the qualitative assessment of progress in the implementation of The Strategy, including on returns on investment. The CRIC will use the analysis of financial information originating from the PPS to assess results, performance and impacts.

To minimize the reporting burden and avoid discrepancies in the information annexed to the reports of different entities, it is recommended that project partners identify the most suitable ways to coordinate among themselves the preparation of PPS to ensure that consistent data are reported for the same projects. It would also be advisable to compile just one PPS for large “umbrella” programmes, instead of separate PPS for each small project stemming from them.

In the PPS template, shaded areas contain information and explanatory texts, while white areas are for reporting purposes and need to be filled in by country Parties and other reporting entities with relevant data or narrative information.

Programme/Project #1 — Programme de développement agropastoral et de promotion des initiatives locales

Title

Enter the Programme/Project title, and sub-title if applicable

Programme de développement agropastoral et de promotion des initiatives locales

Organization(s)

Enter the full name and acronym of the reporting organization

- **International Fund for Agricultural Development**

Programme/Project #7 — Projet de développement agricole intégré (PDAI) de Gafsa

Title

Enter the Programme/Project title, and sub-title if applicable

Projet de développement agricole intégré (PDAI) de Gafsa

Organization(s)

Enter the full name and acronym of the reporting organization

- **African Development Bank**

Other

No answer provided

Role of the Organization(s) in the Programme/Project

Indicate the role of the reporting organization in the Programme /Project (e.g. funding agency, implementing agency, etc.)

Funder (non ODA)

Civil Society Organizations (CSOs) and Science & Technology Institutions (STIs)

Enter the name(s) of Civil Society Organizations (CSOs), including Non-Governmental Organizations, research institutions and-or Science & Technology Institutions (STIs) involved in the Programme/Project. Note: This information should be taken into account in the computation of performance indicator no. CONS-O-3.

- **Bureaux d'études, Groupements de développement**
-

Beneficiary Country(ies) or Sub Region(s)

Enter the name of the Country(ies), Subregion(s) and/or Region(s) benefiting from the Programme/Project. Indicate "Global" in the absence of a specific geographical focus

- **Africa**
 - **Northern Africa**
 - **Tunisia**
-

Target Area size / administrative unit

Indicate the total area expressed in number of hectares (numeric field. Do not use abbreviations, symbols or decimals). Also indicate the administrative unit targeted in the project area, if known, by the Programme/Project

Area Size

480300 Hectares

Administrative Unit

gouvernorat de Gafsa (délégations de Mdhilla, Metalaoui, Redeyef, Moularès, El Guettar et Belkhir)

Target Group

Enter the different stakeholders, such as individuals, groups, or organizations, positively affected through their involvement in the implementation of an initiative/project/programme

- **2803 exploitants : 1000 bénéficiaires localisés dans les exploitations en sec, 921 bénéficiaires localisés dans Périmètres irriguées, 243 bénéficiaires de l'action d'électrification des puits de surface, 289 bénéficiaires de microprojets, 131 bénéficiaires de puits de surface**
 - **189 bénéficiaires de bassins d'irrigation et 30 bénéficiaires de bergerie**
-

Beneficiaries

Enter the total number of people benefitting from the Programme/Project, if known (numeric field. Do not use abbreviations, symbols or decimals)

Identification Code

Enter the Programme/Project identification code (ID) or number, given by the relevant extending agency (if applicable)

P-TN-AA0-005

Status

Indicate the status of the Programme/Project at the time of completing this form.

Completed

Start date (dd/mm/yyyy)

Indicate the date at which the Programme/Project started or is due to start, if known (e.g. 15/01/2011)

09/10/2001

Completion date (dd/mm/yyyy)

Indicate the date at which the Programme/Project was completed or is due to be completed, if known (e.g. 15/01/2011)

30/06/2009

Programme/Project co-financing**Source**

Provide the full name and acronym of all co-financing organisations

- African Development Bank

Other

bénéficiaires

Currency, Amount

For each co-financing, indicate the currency denomination used (e.g. EUR, USD, YEN, etc.)

Indicate the amount of funding provided by each co-financing organisation (numeric field. Do not use abbreviations, symbols or decimals)

36367000 Tunisian Dinar

UN Conventions' Rio Markers

Assign the appropriate Rio Marker to the Programme/Project (refer to the Rio Markers guidance note for more information, examples and instructions)

Additional Information

F. Additional information

The section on additional information is meant to provide an instrument of flexibility in the reporting exercise as well as to enrich the knowledge base of the CRIC on concrete issues faced by affected country Parties and consequently to make more targeted and specific recommendations to the COP. It allows affected country Parties to comment or report upon issues that are not covered elsewhere but that are nevertheless of importance at the national level or within the framework of the implementation of The Strategy and the Convention.

The additional information section allows feedback to be received on the reporting process and on the implementation of NAPs as well as lessons learnt, problems, constraints and bottlenecks faced in terms of human and financial resources. It is also meant to accommodate ad hoc COP requests for reporting on specific topics or new reporting requirements deriving from COP deliberations that may supersede existing ones and imply changes in implementation.

The proposed template for reporting is adjusted to the mandate of affected country Parties within the framework of the Convention, as requested by decision 13/COP.9, paragraph 17.

Reporting process-related issues

Financial resources

Could your country count on sufficient financial resources to meet UNCCD reporting obligations?

Yes

Provide an estimate of the amount invested from your country's national budget into the UNCCD reporting process.

10000 Tunisian Dinar

Human resources

How many people were involved in your country in the UNCCD reporting process?

Number of people

20

Estimate the total number of person/day dedicated by these persons to the UNCCD reporting process:

Number of person/day

45

Knowledge

Could your country count on sufficient technical and scientific knowledge to meet UNCCD reporting obligations?

Yes

Coordination

Was coordination with the relevant implementing agencies satisfactory in order to apply for necessary funds?

Yes

Was coordination at the national level with the relevant line ministries satisfactory in order to comprehensively and coherently report?

Yes

Participation and consultation

Was a participatory or consultative approach applied to involve all relevant stakeholders in the reporting process?

Yes

Validation meeting

Was a validation meeting held as a tool to integrate stakeholders in the reporting process?

Yes

Subregional and regional processes

Did your country actively contribute to the subregional and regional reporting processes?

Yes

PRAIS portal

If you are reporting online, did you receive sufficient training on access and utilization of the PRAIS portal?

Yes

Accommodation of specific requests within COP decisions

Report on specific COP requests – iterative process on indicators

Decision 13/COP.9, paragraphs 2, 3 and 24, envisages an iterative process to refine the set of performance indicators provisionally adopted by the same decision. As a tool to implement this iterative process, affected country Parties can provide here their suggestions and recommendations for improvement.

Tick the cells only when you have experienced difficulties in reporting on one, or more, indicator(s). Indicate against which of the e-SMART criteria the indicator(s) needs to be improved.

Best Practices

G. Best practices

According to decision 13/COP.9, Annex V, UNCCD best practices shall be collected according to seven themes: 1. SLM technologies, including adaptation; 2. Capacity building and awareness raising; 3. DLDD and SLM monitoring and assessment/research; 4. Knowledge management and decision support; 5. Policy, legislative, institutional framework; 6. Funding/resource mobilization; 7. Participation, collaboration and networking.

While themes 2 to 7 represent different elements of the enabling environment needed for the implementation and dissemination/up-scaling of sustainable land management (SLM) technologies (indirect impact), theme 1 comprises all actions on the ground that have a direct impact on desertification, land degradation and drought mitigation.

In particular, as specified in document ICCD/CRIC(8)/5/Add.5, paragraph 12, theme 1 'SLM technologies, including adaptation' refers to SLM technologies that directly contribute to the prevention, mitigation and rehabilitation of desertification and land degradation on cropland, grazing land and woodland, with the aim of improving the livelihoods of affected populations and conserving ecosystem services. Successful implementation of SLM technologies is the base for achieving strategic objectives 1, 2 and 3 of The Strategy. Theme 1 also integrates five of the strategic areas defined by decision 8/COP.4, namely: (a) sustainable land use management, including water, soil and vegetation in affected areas; (b) sustainable use and management of rangelands; (c) development of sustainable agricultural and ranching production systems; (d) development of new and renewable energy sources; and (e) launching of reforestation/afforestation programmes/ intensification of soil conservation programmes.

ICCD/CRIC(8)/5/Add.5 provides definitions for 'practice', 'good practice' and 'best practice'. These definitions are included in the common glossary that shall be referred to by Parties and other reporting entities while reporting to UNCCD, according to decision 13/COP.9, paragraph 8.

The template for reporting is based on the general structure for the documentation of best practices contained in ICCD/CRIC(8)/5/Add.5, paragraphs 40 to 43; it is tailored to the documentation of best practices related to theme 1 'SLM technologies, including adaptation'.

Best Practice #1 — Jessours sur les cours d'eau dans les zones montagneuses du sud tunisien

Property rights

Clarify if the technology described in the template, or a part of it, is covered by property rights:

No

If yes, please provide relevant information on the holder of the rights.

(max 100 words)

No answer provided

Section 1. Context of the best practice: frame conditions (natural and human environment)

Title of the best practice

Jessours sur les cours d'eau dans les zones montagneuses du sud tunisien

Location (if available, also include a map)

Sud Tunisien méridionale, les zones montagneuses des gouvernorats de Gabes, Médenine et Tataouine

Attachments:

- Cropland
- Unproductive land
- Human settlement
- Other

Other (specify) (max 30 words)

Zone d'arboriculture et de parcours

Brief description of the natural environment within the specified location

Climate: (max 50 words)

Le climat de la région se caractérise par une pluviométrie irrégulière et intense, la moyenne pluviométrique régionale varie entre 120 à 224 mm appartenant à l'étage climatique aride inférieur, La température moyenne annuelle est de l'ordre de 26,4°C avec des variations journalières et saisonnières importantes. L'amplitude thermique annuelle est de 21°C, Le sirocco (vent sec désertique) souffle 25 jours par an dans la région. L'évapotranspiration ETP est importante elle dépasse les 1000mm/an

Soil: (max 50 words)

L'épaisseur des sols est inférieure à 40 cm, la texture est en générale grossière à l'exception des bas fonds. La majorité des sols de la région appartient aux textures sablo-limoneux, les sols sont pauvres en matière organique<0.6%

Topography: (max 50 words)

Terrain accidenté, c'est la zone montagneuse de la chaîne de Matmata, dans le sud-est tunisien, zone caractéristique des hauteurs arides du pays, avec des piedmonts et glacis

Prevailing socio-economic conditions of those living in the location and/or nearby

Income level: (max 50 words)

Le taux de chômage s'élève à 19,7 % dans les zones rurales des Matmatas selon les données de l'INS de 2004

Main income sources: (max 50 words)

Bien qu'aride, l'activité économique dominante est l'agriculture surtout derrière les jessours et les tabias (arboriculture, pastoralisme, et céréaliculture en sec) occupant environ 20 000 familles).

Land tenure and land use rights: (max 50 words)

Près de 32% des terres cultivées et de parcours ont un statut foncier collectif, le reste a été attribué aux agricultures, mais le problème réside dans l'immatriculation des titres fonciers pour accéder aux crédits agricoles

Short description of the best practice

max 250 words

C'est une pratique très ancienne qui caractérise les zones montagneuses du Sud tunisien (les chaînes des Matmatas). Les jessour se localisent tout le long des thalwegs qui constituent les cours d'eau inter montagnes. Un jesser est formé par une digue en terre (katra ou tabla) consolidée en amont (sdar) et en aval (gfaa) par des pierres sèches, un déversoir central (masref) et/ou latéral (manfes) pour l'évacuation des eaux de débordement, et la retenue ou on pratique de l'arboriculture (olivier, figuier, palmier, amandier) et de la céréaliculture (orge et blé). La retenue se forme progressivement par la sédimentation des matériaux de charriage qui permet

On the basis of which criteria and/or indicator(s) (not related to The Strategy) the proposed practice and corresponding technology has been considered as 'best'?

max 100 words

Dans des zones arides et des terrains accidentés et très dégradés ou les terres arables sont rares, la population locale a besoin de fixer et de collecter, les sols érodes et les quelques mm de pluie pour satisfaire leurs besoins en plantant des arbres fruitières a rentabilité économique élevée comme l'olivier et le figuier sur les ouvrages hydrauliques traditionnels typiques qui caractérisent les zones montagneuses à climat aride et à pente moyenne à forte du Sud tunisien.

En adoptant une hypothèse faible de 100m³ retenus par un jessour annuellement, donc pour 20 mm de pluie et pour un coefficient de ruissellement de 50% et un nombre approximatif de 10.000 jessours permettant le captage de près de 10 millions de m³/an s'infiltrant souterrainement pour alimenter les nappes et s'échappant ainsi au ruissellement et une bonne partie à l'évaporation.

Section 2. Problems addressed (direct and indirect causes) and objectives of the best practice

With respect to DLDD, the best practice directly contributes to:

- Prevention
 - Adaptation
 - Rehabilitation
-

Main problems addressed by the best practice

(max 50 words)

- Protection des infrastructures et des agglomérations urbaines et rurales des inondations et des crues cycliques, vu le caractère torrentiel des pluies dans la région aussi bien le caractère squelettique des sols
 - Terrains montagneuses accidentés et arides, ou le paysage désertique et dégradés qui domine et les activités alternatives sont rares dans ces zones à topographie difficile et à dominance rurale avec la rareté de l'eau
 - problème de rareté de l'eau de boisson ou pour satisfaire les besoins des plantes et du cheptel
 - Des pasteurs et paysans sans terres arable et démunis des moyens financiers pour assurer leurs propre autosuffisance alimentaire
-

Outline specific land degradation problems addressed by the best practice

max 100 words

- Rareté de terres fertiles et des plaines pour la pratique de l'agriculture extensive
 - Rareté des sources d'eau durant la longue période de sécheresse
 - Erosion hydrique forte durant les périodes d'averses vu le caractère accidenté des terres du sud Ouest Tunisien
-

Specify the objectives of the best practice

(max 50 words)

- Reconstitution des terres fertiles pour pratiquer l'agriculture et ce par la conservation des eaux et du sol
- Accroître les opportunités de sources de revenus des populations rurales et leur fixation dans les zones difficiles pour diminuer l'exode et la migration
- Adaptation à la sècheresse par la mobilisation des eaux de ruissellement et la rétention du sol en amont des ouvrages
- Recharge des nappes souterraines à travers la mobilisation au niveau des zones d'alimentation des aquifères de la région

Section 3. Activities

Brief description of main activities, by objective

Objective 1

(max 50 words)

- confection et entretien des ouvrages hydrauliques (jessours)

Objective 2

(max 50 words)

- plantation des arbres fruitiers adaptés au climat et à haute valeur économique (olivier figuier, amandier, pistachier)

Objective 3

(max 50 words)

- conservation de la diversité biologique agricole in situ

Objective 4

(max 50 words)

- des opérations de techniques de conservation des eaux et du sol (gabion, murette, plantations des arbres)
-

Short description of the technology

max 250 words

L'ouvrage "Jesser" est formé d'un petit barrage(Tabia ou Ketra ou Ced), de la terrasse à l'amont immédiat (généralement cultivée) et de l'impluvium.

Technical specifications of the technology - if any

max 250 words

on appelle, à Matmata, « Jessour », l'ensemble du complexe qui le fait une unité hydraulique et se constitue de l'ouvrage-barrage proprement dit ; la terrasse à l'amont immédiat (généralement cultivée) et de l'impluvium (soit inculte soit à essences forestières dispersées)

Le barrage : il est construit au travers du talweg, perpendiculairement à la pente, si la construction est en pierre sèches, ils seront déposées les unes sur les autres dans un ordre précis, avec calage, rangée par rangée avec une épaisseur de plus de 3 mètres, la forme sera prismatique et le mur-barrage se prolongera au de la largeur du lit d'oued

Plus de 1,5 m de hauteur de l'ouvrage il sera en escalier pour briser l'énergie de la crue

La terrasse : Coté amont, le lit du Talweg qui va mobiliser les apports de l'amont du bassin versant (sédiments véhiculés par les eaux de ruissellement) tant qu'il n'ya pas rupture de l'ouvrage.

L'impluvium: est délimité par la ligne de partage des eaux entre les différents jessours. L'apport annuel dépendra de la superficie de l'impluvium et du couvert végétal sur les versants

Section 4. Institutions/actors involved (collaboration, participation, role of stakeholders)

Name and address of the institution developing the technology

Name

La Direction Générale d'Aménagement et de Conservation des Terres Agricoles (DGAETA)

Address

Avenue Alain Sfary, 1002 Tunis, 30 le Belvédère

Name

l'institut des régions arides de Médenine (IRA)

Address

Route Eljorf, km 22.5, 4119 Medenine, Tunisie

Name

Les chercheurs en matière d'aménagement des bassins versants (CES, Production agricole et hydrologie)

Address

pas disponible

Name

les ONG locales

Address

pas disponible

Name

les groupements de développement agricole

Address

pas disponible

Name

population locale

Address

pas disponible

Was the technology developed in partnership?

Yes

If yes, list the partners:

- Technique traditionnelle développée par les populations locales et améliorée par les services techniques du Ministère de l'Agriculture, des Ressources Hydrauliques et de la Pêche et les instituts de recherche, l'institut des régions arides (IRA) et l'Institut National Agronomique de Tunis (INAT)

Specify the framework within which the technology was promoted

- Local initiative
- Programme/project-based initiative

Other (specify) (max 30 words)

No answer provided

Was the participation of local stakeholders, including CSOs, fostered in the development of the technology

Yes

If yes, list local stakeholders involved:

- les services techniques du commissariat régional de développement agricole
- La population locale
- les chercheurs de l'institut des régions arides

For the stakeholders listed above, specify their role in the design, introduction, use and maintenance of the technology, if any.

max 250 words

par le biais des chantiers engagés par les services des CRDA employant les populations rurales, ayant le savoir faire traditionnels, et encadrés par les chercheurs de l'institut des régions arides de Médenine, ont pu élargir cette technique pour d'autre régions du sud tunisien, aussi bien à travers le programme nationale de conservation des eaux et du sol et à travers les projets de développement agricole intégré

Was the population living in the location and/or nearby involved in the development of the technology?

Yes

If yes, by means of what?

- Participatory approaches
- Other

Other (specify) (max 30 words)

main d'oeuvre locale à travers les chantiers des projets de conservation des eaux et du sol

Section 5. Contribution to impact

Specify to which strategic objectives of The Strategy the technology contributes

(more than one box can be ticked)

- 1. To improve the living conditions of affected population
 - 2. To improve the conditions of affected ecosystems
 - 3. To generate global benefits through effective implementation of the UNCCD
-

Describe on-site impacts (the major two impacts by category)

Production or productivity:

1. (max 50 words)

la reconstitution des terres productifs à vocation arboricole dans des zones arides et alimentation de la nappe de près de 10 millions de m3 /an

2. (max 50 words)

Améliorations de la production arboricole et surtout de l'olivier qui peut atteindre une production de 400 kg à l'arbre soit 120 kg d'huile pour un revenu de 150 dollars par arbre par an, en plus des variétés d'orge locales emblavées en intercalaire avec l'arboriculture fruitière

Socio-economic level (including cultural level):

1. (max 50 words)

Amélioration des conditions de vie des populations locales exploitant les jessours

2. (max 50 words)

No answer provided

Environmental level:

1. (max 50 words)

Amélioration de la fertilité des sols et augmentation de la capacité de rétention des eaux pour satisfaire les besoins hydriques des plantes durant leurs cycles de croissance et de production et la recharge de la nappe

2. (max 50 words)

Diminution de l'érosion hydrique et du charriage mettant en cause le trafic routier.

Other (specify)

1. (max 50 words)

No answer provided

2. (max 50 words)

No answer provided

Describe the major two off-site (i.e. not occurring in the location but in the surrounding areas) impacts

1. (max 50 words)

recharge de la nappe souterraines par les quelques dizaine de millions de m3

2. (max 50 words)

protection contre les inondations

Impact on biodiversity and climate change

In your opinion does the best practice/technology you have proposed positively impact on biodiversity conservation?

Yes

Explain the reasons:

max 250 words

Préservation in situ des espèces locales arboricoles adaptées à la sécheresse, essentiellement le figuier, l'olivier, amandier, pistachier, palmier et quelques variétés locales d'orge

In your opinion does the best practice/technology you have proposed positively impact on climate change mitigation?

No

Explain the reasons:

max 250 words

No answer provided

In your opinion does the best practice/technology you have proposed positively impact on climate change adaptation?

Yes

Explain the reasons:

max 250 words

La pratique contribue à réduire, dans la zone ciblée, la vulnérabilité des populations et de la nature face aux conséquences actuelles du changement climatique, comme est le cas pour la Tunisie qui prévoit une baisse de précipitations et augmentation de la température. Cette technique est considérée comme exemple d'excellence d'adaptation à la sécheresse pour produire sur des superficies limitées mais atteindre des records de production par individus. Selon N. Ennabli (1993), Les jessours, ont vu affluer une population qui s'est volontairement isolée dans une zone aride que rien ne prédestinait à devenir un des plus grands foyers hydrauliques de la Tunisie Méridionale

Has a cost-benefit analysis been carried out?

Yes

If yes, summarize its main conclusions:

max 250 words

Les résultats de l'Analyse coûts avantages établis par Sghaier et al (2002), a montré que le TRI et la VAN s'améliorent progressivement d'une étape à l'autre selon la méthode FORCES MOD. En effet, ils évoluent respectivement de 5,47 % à 27,8 % et de -1,065 à 1,150 millions de dinars tunisiens (MDT) de l'étape (analyse financière) à l'étape (analyse socioéconomique). En effet, Au niveau de l'analyse économique élargie II (AEE2), la prise en compte de l'effet de la recharge de la nappe à partir des ouvrages de CES et d'amélioration de la qualité de la vie de la population a permis une augmentation du TRI à 25,98 % et une nette amélioration du VAN qui dépasse 1 MDT. L'analyse économique et sociale a révélé une amélioration nette du TRI qui passe à 27,8 % et une légère amélioration du VAN qui passe à 1,150 MDT. Ainsi, ce travail a pu montrer une rentabilité satisfaisante de ces aménagements aussi bien aux niveaux financier et économique qu'environnemental

Specify if the technology relates to one or more of the other UNCCD themes

- DLDD and SLM monitoring and assessment/research
 - Participation, collaboration and networking
-

Section 7. Adoption and replicability

Was the technology disseminated/introduced to other locations?

Yes

If yes, where? (add as many rows as necessary)

Location:

- Dans les Zones montagneuses des gouvernorats du centre ouest, gouvernorat de Gafsa
 - Gouvernorat de Kasserine
 - Gouvernorats de Tataouine et Médenine
-

Were incentives to facilitate the take up of the technology provided?

Yes

If yes, specify which type of incentives

- Financial incentives (for example, preferential rates, State aid, subsidies, cash grants, loan guarantees, etc)
-

Can you identify the three main conditions that led to the success of the presented best practice/technology?

Examples of conditions leading to success may include: highly motivated local governments, farmers organized into well structured cooperatives, extremely favorable weather conditions, etc. For each 'condition of success' you are able to identify, specify whether in your opinion such condition is: (a) linked to the local context and thus cannot be replicated elsewhere; (b) replicable elsewhere with some level of adaptation; (c) replicable elsewhere with major adaptation.

1. (max 50 words)

Technologie peu coûteuse basée sur un savoir faire traditionnel

2. (max 50 words)

Prise en charge par l'Etat pour la construction et la sauvegarde des ouvrages

3. (max 50 words)

Impact environnemental positif (recharge de la nappe, production arboricole dans des zones arides, lutte contre les inondations)

In your opinion, the best practice/technology you have proposed can be replicated, although with some level of adaptation, elsewhere?

Yes

If yes, at which level?

- Local
 - Sub-national
 - National
-

Section 8. Lessons learned

Related to human resources

(max 50 words)

- valorisation du savoir faire local à travers l'amélioration de la conception de l'ouvrage pour minimiser les risques de son effondrement
-

Related to financial aspects

(max 50 words)

- L'utilisation des entreprises locales pour les travaux de confection des ouvrages, ainsi que de la main d'œuvre locale, le matériel (pierres) et des espèces végétales locales, a permis de maintenir le coût global de l'ouvrage à un niveau raisonnable.
 - La valorisation des Jessours pour la plantation des arbres à haute valeur économique
-

Related to technical aspects

(max 50 words)

- Pour que ce type d'aménagement soit étendu avec de fortes chances de réussite, on doit travailler sur les conditions de stabilité de l'ouvrage vis-à-vis à l'arrivée de l'onde de crue destructrice et le dimensionnement de la taille et du nombre d'ouvrages pour optimiser la mobilisation de l'eau et le nombre de pieds à planter (en fonction des besoins en eau des plantations).
